Machine Learning
Distributed Systems
Intrusion Detection
Experimentation
Federated Learning
Poisoning
Reproducibility
Systematic benchmarking
Byzantine clients
Reputation & Trust
Contribution Quality
Clustering
Topology Generation
Independent Datasets
Realistic Evaluation of Distributed IDS
Interpretability
Semantic Aggregation
Scalable & Trustable Collaborative Learning
Efficient Use of the Communication Layer
Decentralized Reputation Systems
Decentralized Quality Assessment
Decentralized Community Clustering
Data Heterogeneity
Collaborative IDS
New Data Representations
Partial Observability
Reasoning under Uncertainty
Contributions
Systematic Literature Review
Assessment (eiffel)
RADAR
FedITN
AI Tracing with Watermarks
Ongoing works
Gossip Learning on Wireless
